

Enrichment Through Culture Volunteer Interest Form

Lights and Sound

The light and sound board operators are responsible for running the lights and sound (both music and sound effects) during a play. The light and sound board operators do not need prior experience and will be taught everything they need to know. Volunteers for the light and sound board will have the opportunity to work with an experienced technician before they run the boards alone. Generally one person will operate each board, although if lights and sound are simple, one person may run both boards.

Light and sound board operators are needed for one to three technical rehearsals, and for all performances.

Interested in volunteering? Contact us at info@cumberlandetc.com, or call 715-822-2787 and leave a message.
